## D-EyE X6EL22A Body Worn Camera

## About this Guide

The content in this document is for information purpose and is subject to change without prior notice. We have made every effort to ensure that this User Guide is accurate and complete.

However, no liability is assumed for any errors or omissions that may have occurred.

The manufacturer reserves the right to change the technical specification and accessories without prior notice.

## Caution

Do not expose battery being placed in high temperature environment. If battery leaks or bulges, stop to use.

Risk of explosion if battery is placed by an incorrect type.

Dispose of used batteries according to the instructions.

Never replace the battery on your own. Doing so may cause the damage or explosion. Please have the dealer do it for you.

Do not put the LCD display or lens under the sunshine.

## Note

A specific emission frequency may influence the image quality.

Please try a few times of video-taking test before you formally use this product in order to be familiar with this product.

Always full charge the battery before use.

Never dismantle, crush, or pierce the product, or allow the product to short-circuit. Please persuade for professional assistance if the product doesn't work properly.

**Before you start using this product, it is assumed that you agree to the above statement.**

## **5.14 USB Driver video/picture/audio files can only be deleted on your PC/laptop.**

After being connected to PC, password interface shows up, please enter the password (default password is 000000) Press the (ok) button 6 times, the camera will be recognized by the computer as Extra drive. User can go to camera folder and delete those files not needed.

## **5.15 Charging**

When camera battery is low, the battery icon will flash in the display, and you will hear a alert tone. When this happens, charge the camera.

While camera is charging, indicator light turns red and will turn green after camera is fully charged. It will take approximately 4 hours to fully charge the camera.

### **Charging methods:**

- 1). Use a USB cable to connect camera's USB port to a USB port on your computer (powered on) or USB power adapter (connect to a power outlet)
- 2). Attach camera to the docking bay. Use a USB cable to connect the docking bay to a USB port on your computer (powered on) or USB power adapter (connect to a power outlet).

## 5.16 WiFi

**WiFi: AP mode** - used for single device real time video review and controlling.

**Get the Wifi APP “Eyescam Pro”:**

Android system phone & tablet: Scan below QR code

iOS system phone & tablet: Search “Eyescam pro” in App Store

Go to camera menu and Turn on “WiFi”. You will see GREEN WiFi icon on top of screen.

Go to phone/tablet WiFi setting. Find out your body camera's WiFi SSID (H22\_WIFI\_AP as default) and select, then input WiFi password (12345678 as default) and connect.

Open Eyescam Pro and tap “connecting device” to enter camera interface.

Tap resolution window to change video resolution.  
Tap setting icon to enter simple setting menu.

Tap RED button to start/stop video recording. Tap PHOTO button to make a snapshot.

Tap “Recorder File” to view the video and photo files.

**STA mode** - used to view and control multiple cameras inside internal network.

Operation is as below:

1, Set “WiFi” to “ON (STA)” on menu.

2, Connect camera to Cam Manager program and set WiFi parameter to same as WiFi router (enter WiFi router info and then click “Set”).

Network

WIFI Information

SSID:  Password:

4G Information

APN Addr:  4G PIN:

APN User:  Password:

Server Information

IP:  Port:

3, Go to WiFi router setting to check the body camera IP address distributed by router. (If needed, please check with router vendor on how IP address is distributed).

4, Open VLC player and click “Ctrl+N”, then enter `rtsp://IP Address/live` or `rtsp://192.168.1.5/live`. You can view real time stream from camera.

## 7. Camera setting through CAM MANAGER

Camera setting can be changed within the menu or by PC software CAM MANAGER (stored in auxiliary CD)

1, Open CAM MANAGER and enter password, connect and login. (Default password is 000000)

Camera Manager 3.6 ×

# Body Worn Camera

User Type :

Password :

2, Click “Get” to show up camera original settings. Choose target setting and click “Set”, then setting is changed.

The screenshot shows the 'Camera Manager 3.6' application window. It is divided into several sections for configuring a camera:

- ID Information:** Fields for Device ID (00000) and Police ID (000000) with 'Get' and 'Set' buttons.
- Password:** Fields for Old Password and New Password with 'Get' and 'Modify' buttons.
- Camera:** Displays TF (29.7GB/29.8GB) and FW Version (HUV\_xw\_v1.07\_201102) with 'Set Default', 'Set Time', and 'Enter U Disk' buttons.
- Network:** Includes WIFI Information (SSID: H22\_WIFI\_AP, Password: 12345678) and 4G Information (APN Addr, APN User, 4G PIN, Password) with 'Get' and 'Set' buttons.
- Server Information:** Fields for IP and Port with 'Get' and 'Set' buttons.
- Camera Config:** A large section with numerous dropdown menus and checkboxes for settings like Resolution (848x480 30P), Quality (Normal), Codec (H.264), Split Time (15 Min), Loop Record (OFF), Pre-Record (OFF), Live Stream (Resolution: 848x480 30P), Infrared (MANUAL), Time Zone (0), Volume (6), GPS (OFF), Rec. Warning (OFF), G-Sensor (OFF), Coding Format (H.264), Infrared (MANUAL), 4G (OFF), WFI (OFF), Post-Record (OFF), Auto Record (OFF), Motion Detect (OFF), Photo Size (SM), EIS (OFF), and AES Encryption.

3, Click “Enter U Disk” (upper right corner) to make camera to be recognized by PC as a folder. You can check all files from the camera folder.

This is a close-up view of the 'Camera' section from the previous screenshot. It displays the following information:

- Camera** (Section Header)
- TF :** 0.0GB/29.8GB
- FW Version:** HUV\_xw\_v1.06\_201015
- Buttons: 'Set Default', 'Set Time', and 'Enter U Disk'. A red arrow points to the 'Enter U Disk' button.

## IMPORTANT INFORMATION

### **The clips and attachment studs rotate 360 degrees -**

The crocodile clip, epaulette clip, chest harness and shoulder harness attachment studs ALL turn 360 degrees. Slot the clip into the back of the camera then turn the clip vertically. Or you can slot the clips into the back of the body camera first, then attach the body camera to the chest or shoulder harness, then turn the body camera vertically.

### **Reset device-**

To reset the device, use a small needle to jab the reset button. The reset button is located next to the USB port.

### **Delete files -**

You can only delete the recorded files from a computer. This is to stop people from getting rid of the evidence straight from the device itself. To delete the files from your computer, right click, and then delete them.

### **Product warranty -**

We offer a 12-month warranty on the body camera. This warranty covers faults that were caused by the manufacturer. If the fault was caused by the customer, then the warranty will be void.

### **USB cable -**

Please only use the USB cable provided in the product box. Using other USB cables might cause damage to the body camera.

### **Attention -**

Please charge camera fully after camera is left without working for long time. Please keep camera bottom away from water to avoid short circuit or oxidation.

Please don't disassemble camera without authorized instruction.
